Leading Industrial Hydraulic Systems Integrator looking for Journeyman Electrician with expertise in wiring, mechanical assembly and testing to build panels for pump and motor controllers. This is a long term position with potential for growth into PLC and Instrumentation control.

**Essential Duties**

- Read, understand, and translate schematic and assembly drawings into finished products.
- Layout, assemble and wiring of all products.
- Help set up clean room build area.
- Requisition of required parts to purchasing
- Implement test plans for finished products.

**Required Skills**

- Oregon General Journey Electrical License
- Proficiency in the knowledge of and application of National Electric Code
- Ability to read a drawing and drill, tap, cut holes and fabricate brackets to mount electrical components using a variety of hand and power tools and equipment.
- Able to crimp connectors, solder, read color codes, route and connect wires accurately following provided schematics.
- Ability to understand the function of the products and test completed assemblies.
- Work as part of a team communicating with sales and engineering, vendors and customers.
- Able to work with minimal supervision.

**Job Experience**

- 3-4 years prior experience in the electrical industry, assembling and wiring electrical panels is required.

We will reward your hard work and achievements with a competitive base salary depending on experience. We offer a comprehensive benefit package (medical, dental, disability, and life), and 401(k) plan with company matching.
