FIELD SERVICE

Washington and Oregon Only

24 / 7 / 365

FIELD SERVICE

Hydraulic/Pneumatic Management:

- Oil sampling and reporting
- Flow and pressure testing
- Troubleshooting
- Preventive maintenance
- Quality control inspections and reports
- Air system evaluation (PASS)

Installations:

- Custom manufactured parts or equipment
- Piping, tubing, hoses, and fittings
- Accumulators, cylinders, manifolds, motors, pumps, and valves
- Welding and fabrication
- Lubrication systems

Repairs or Special Concerns:

- Component removal for repairs
- Hose and tubing replacement
- Manifold reseal, valve body resealing
- Pump and motor rebuilds
- Sensors (temp, pressure, vacuum)
- Lubrication components
- Pneumatics

Equipment Services:

- Industrial and commercial recycling equipment (Compactors & Balers)
- Industrial applications and equipment
- Marine applications and equipment
- Customer specific applications

IN HOUSE / SHOP SERVICE

Component Distribution:

- Accumulators
- Filters
- Actuators
- Cylinders
- Motors, pumps, valves
- Lubrication components
- Pneumatics
- System monitoring software
- Wireless & remote system control

Manufacturing:

- Hydraulic Power Units & Manifolds
- Accumulator mounts and brackets
- Motor and pump mounts
- Welding and fabrication
- Customer specific equipment
- Integrated system solutions

Repairs:

- Accumulators and bladders
- Cylinders (rods, pistons)
- Motors
- Pumps
- Hydraulic valves
- Lubrication components

Consulting Design:

- Manifold
- System
- HPU
