KONGSBERG
AUTOMOTIVE

Kongsberg Automotive's
KAntrak displays have established a new

standard for intelligent, multi-function displays and are the perfect platform to empower your electronic systems with flexibility and control. **WIT** offers several different **KAntrak** displays, including the **1700**, **2700**, and the new **3700**.

Western Integrated Technologies also offers a full line of customizable cables, controls, and accessories to complete your **Kongsberg Automotive** needs.

Parker's IQAN system is a totally electronic approach that replaces mechanical and electromechanical systems for controlling and monitoring hydraulics in mobile machines. With **IQAN**, **Western Integrated Technologies** provides complete freedom to design customized software that is tailored specifically for your system.

RACOR

Parker Racor crank case ventilation filters, oil filters, fuel filters, and precision fuel management products are the perfect compliment to engines designed for heavy duty applications.

Tier 4 Engineering & Support

Emmegi manufactures heat exchangers for industrial machinery, mobile and construction machinery, air compressors, diesel engines, and more.

WIT can set you up with the **Emmegi** product of your choice:

- Air-oil Heat Exchangers
- Water-Oil Heat Exchangers
- Combined for Moving Machinery
- Autonomous Cooling Units
- Combined for Compressors
- HPU TK Series
- Accessories

WIT engineers have been installing **Emmegi** heat exchangers for years with great success. Let us share that success with you.

Parker Cross-Flow
Oil Cooling System

- Electronic Controlled Fan
- 15 Gallon Storage Capacity
- Aluminum Tank Construction
- In-Tank Filtration
- Sight Temperature Gauge

Parker Vansco displays are rugged, reliable, and designed for original equipment manufacturers in the bus, truck, agricultural, and construction equipment industries. **WIT**'s engineers have decades of experience integrating and designing electronic systems. Let us help you set up your own custom dashboard and control systems.

WIT Build Programs

Western Integrated Technologies has developed build programs for several lines of products. What this means is that we stock base units, as well as the parts needed to convert these units to other variations of the core unit. Due to the fact that we regularly restock these parts and units, it effectively eliminates the long factory lead times. Our special pricing also allows us to sell these products at great prices.

Western Integrated Technologies (WIT) supplies industry leading companies and manufacturers of mobile and industrial equipment, with integrated fluid power, mechanical, electronic, and software solutions. **WIT** looks forward to the opportunity of providing integrated cost-effective total system solutions, and world class delivery to meet your needs.
