# Pressure Filters

A NEW STANDARD IN 7,000 PSI PRESSURE FILTERS

Designed to

- Minimize waste and promote energy efficiency
- Reduce operating maintenance costs

WPF Features

Benefits to Your Business

Ecoglass (Non-Metallic) Construction	Environmentally Friendly. Reduced disposal costs
Built in system Protection from back-flow	Component performance integrity with improved flow fatigue resistance
Integrated bypass & reverse flow valve technology	Reliable, high performance, quick response design
Low Mass, low $\Delta P$ reverse flow valve technology	Greater design and service flexibility
Patented deformable tangs	Easy, fast, safe and clean
Element removal clearance is benchmarked best in class against major competitors	Easy element removal, ease of service and machine design flexibility
Patented valves with low hysteresis	Zero leakage and low friction
