Industrial IoT Platform

Immediate Access to Value

Platform access takes only minutes. Jump right in and take full advantage of the platform.

Machine Agnostic

Built for the industry by the industry. Designed to work on any machine or device.

Cloud Based

Always available, infinitely scalable, ultimately secure.

Fully Integrated

Seamlessly connect to your ERP, supply chain, or any other business critical system.

Robust Reporting

Flexible reporting via configurable widgets, and the ability to bridge powerful analytic engines.

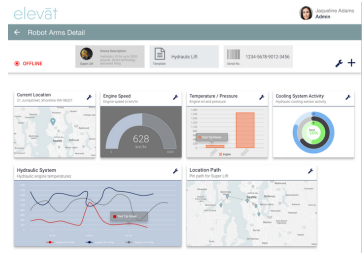

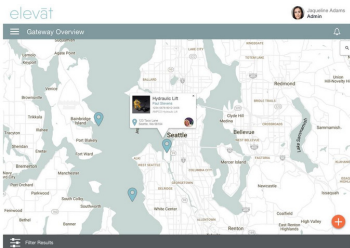

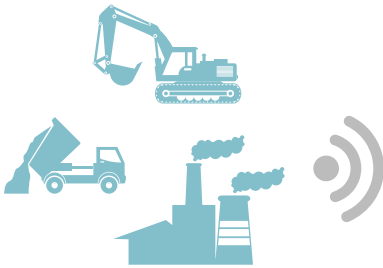

Configurable

Modular design allows for the highest degree of flexibility, extensibility, and configuration.

Elevat's software solution provides customers the ability to easily collect data from any machine with sensors. This data provides the information that allows the customer to drive efficiency and reduce costs.
